“OVERVIEW OF SAR INTERFEROMETRY APPLICATIONS” & “SENTINEL SUSTAINABLE DATA AND SNAP S/W”

GIOVEDÌ 10 MAGGIO 2018

ALLE ORE 11:00 – 12:00

Facoltà di Ingegneria, Aula 5, Roma.

Issaak Parcharidis, Earth Observation Applications, Assoc. Professor, *Dep. of Geography, Harokopio University, Athens*

Nel seminario tenuto dal Prof. Parcharidis vengono discussi principi di acquisizione, le tecniche utilizzate e le potenzialità del remote sensing, in particolare della tecnica InSAR e DInSAR, nell'ambito del telerilevamento di fenomeni naturali a scala regionale e locale come: Terremoti; Subsidenza; frane ed inondazioni.

SHORT CURRICULUM VITAE del Prof. ISSAAK PARCHARIDIS

Harokopio University of Athens, Dep. of Geography

EI. Venizelou 70, 17671, Athens, Greece

Phone: +30210 9549345, e-mail: parchar@hua.gr

The basic objective of his research concerns the use of Space Earth Observation data in the estimation of natural hazards and disasters management. Particularly last years the research interest is focus on:

- *the advanced space techniques of SAR Interferometry aiming the detection, mapping and monitoring of ground deformation in urban and rural environment due to natural or anthropogenic causes.*
- *high resolution satellite images for emergency plans development*

2001-2003 Member of the United Nations Action Team n. 7 (Committee on the Peaceful Uses of Outer Space) aiming the development of a global management system for disasters management, based on space techniques.

2010 Short visit fellowship from CNR (Rome)

2001-2004 Member of the administrative board of the Earthquake Planning and Protection Organization of Greece

2016 Invited professor at ENS/department of geosciences

2017 Visiting Professor at European Space agency/ESRIN
